

Learning Outcomes

1. Understand the fundamentals of project planning in the context of educational technology initiatives.
2. Identify and assess the key components of an educational technology project, including goals, scope, resources, and timelines.
3. Develop a comprehensive project plan that aligns technology integration with educational objectives.
4. Effectively manage stakeholders and resources to ensure project success.
5. Monitor, assess, and adjust project execution to meet changing educational needs and overcome challenges.
6. Apply risk management strategies to mitigate potential issues related to technology adoption and integration.
